High

High risk

The URL 'https://headlinelogic.com/' has a high threat score of 74, indicating a significant risk of phishing. The primary risk drivers include the presence of credential collection elements such as password fields in forms, which are commonly used in phishing attacks to harvest sensitive information. Additionally, the domain has a visual similarity score of 0.65, suggesting it may resemble a legitimate site. Despite having a valid SSL certificate issued by Let's Encrypt, the absence of email authentication protocols (SPF, DKIM, DMARC) and missing security headers further contribute to the high risk assessment.

SUBJECT

Analyzed domain	headlinelogic.com
Analyzed URL	https://headlinelogic.com/
Analysis mode	manual_entry

KEY EVIDENCE

CRITICAL	Page asks you to enter a password	content
MEDIUM	The domain has no email authentication set up	email_auth
