

67

/ 100

High

High risk

The URL 'https://mercedes.com/' has a high threat score of 67/100 due to several risk factors. The normalized domain 'mercedes.com' closely resembles the canonical domain 'mercedes-benz.com', with a high lexical similarity score of 0.923, indicating a potential typosquatting attempt. Additionally, the SSL certificate is valid but issued by a known issuer, and the domain has a low DNS history change count. The page title 'Access Denied' and low HTML similarity score suggest the site may be a phishing attempt. Despite the valid SSL certificate, the overall risk factors lead to a High verdict.

SUBJECT

Analyzed domain	mercedes.com
Analyzed URL	https://mercedes.com/
Target brand	Mercedes-Benz
Brand confidence	90% (IIm)
Analysis mode	manual_entry
