Critical

Likely phishing

The URL 'https://sparkasse-login.de/' exhibits several indicators of phishing. The domain name closely resembles the canonical domain 'sparkasse.de' with a high lexical similarity score of 0.92 and a Jaro-Winkler similarity of 0.92. The presence of the keyword 'login' and the use of a single hyphen in the subdomain are common tactics in typosquatting. Additionally, the threat score of 75 and the critical verdict are driven by the high lexical risk factors, including a high edit distance and Levenshtein distance from the legitimate domain. The absence of SSL validation further increases the risk.
